

Product Information

Hygiene And Cleaning Items

Product Overview & Key Features

Cleaning and caring for your warewasher is as important as cleaning the glasses and crockery that goes into it. Keeping the warewasher clean will assist in prolonging the life of the machine and eliminates the chance of any debris attaching itself to otherwise clean items.

Clenaware provide a number of items that can be used to assist in keeping your warewasher clean. A good machine cleaning schedule will ensure that your warewasher provides consistent results with every wash.

With the risk that pathogens can be active on surfaces for several days, it is imperative to follow a strict cleaning schedule. This involves sanitising all worktops and tables with a sanitising cleaner and using a good quality hand soap sanitiser to wash hands thoroughly.

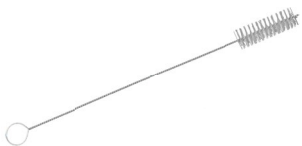

Cabinet Brush

A cabinet brush is a specialist tool for cleaning the inside of the wash tank, door, filters and sills, without scratching the surfaces inside.

Spraybar Cleaning Brush

A spraybar cleaning brush should be used for cleaning the inside of the wash and rinse arms inside your warewasher. The Cleaware spraybar cleaning brush is a specialist tool designed to fit inside the spraybars and give great results every time you clean.

Wash And Rinse Jet Cleaning Tool

A wash and rinse jet cleaning tool should be used for cleaning the inside of jets. Simply remove the jets from the arms and use the specialist tool to clean the jets and remove any debris or build up of scale and chemicals.

Stainless Steel Cleaner

The stainless steel cleaner is a liquid spray which can be used to remove grease and smears from the stainless steel surfaces of your warewasher. Provided in a 750ml trigger spray bottle, the stainless steel cleaner is non tainting and suitable for use on food preparation surfaces.

Sanitising Cleaning Products

Clenaware supply a range of anti-bacterial and sanitising cleaning products from high-quality hand sanitiser with a minimum of 72% alcohol for the removal of germs and bacteria to multi surface concentrate for daily maintenance and hygiene control across all washable hard surfaces.
